

I CAN SEE THROUGH WHAT YOU DID THERE.

Join AFOLs Alyska Bailey Peterson and Chris Doyle for a presentation on one of the more neglected parts of the LEGO color palette - translucent bricks! We'll cover a couple of different building styles, demonstrate how to combine colors and vary parts to diversify your palette, and talk about other unique uses for the parts you can see through.

Who We Are

- ▣ Alyska Bailey Peterson
 - PointyKitty Studios
- ▣ Chris Doyle
 - ReasonablyClever.com

What We'll Be Looking Through

- ▣ The basics of Trans Building
- ▣ Color Theory
- ▣ Who's Building with Transparent Brick
- ▣ Stained Glass Specifics
- ▣ Sculptural Building

The Basics

- ▣ Programs vs Free Hand
- ▣ Parts Availability vs Budget
- ▣ HARD TO FIND
- ▣ EXPENSIVE
 - \$125 vs \$575 (2500 piece mosaic 50x50)
- ▣ Size matters

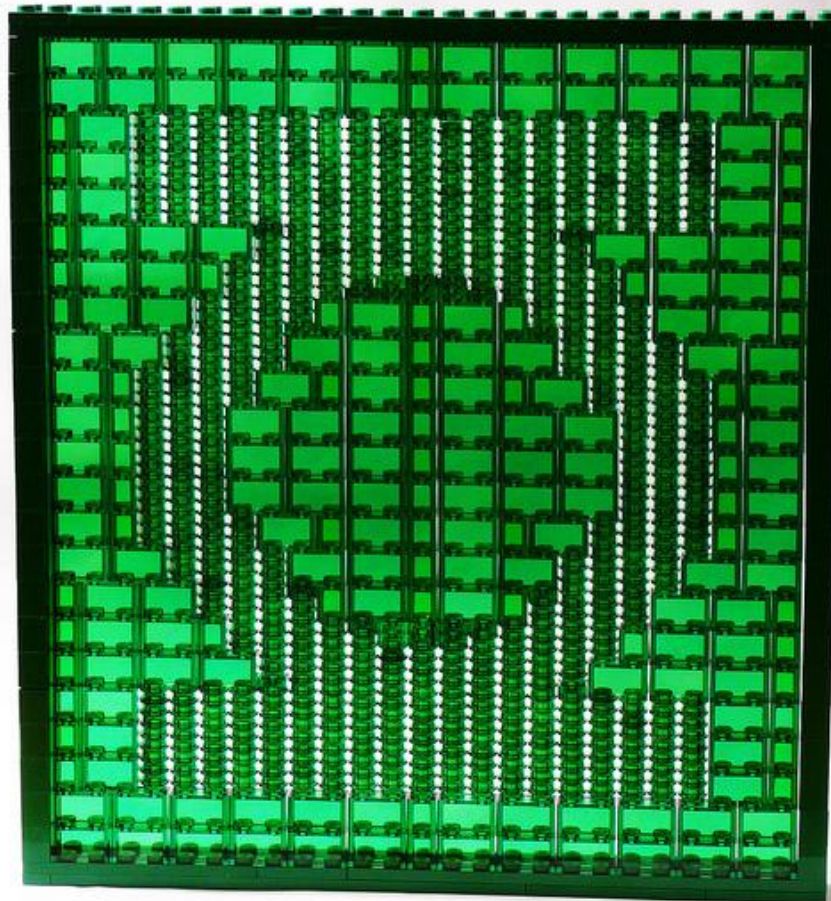

Color Theory

- ▣ Orientation of parts
- ▣ Studs up vs. studs out vs. studs right vs. cheese wedge
- ▣ Layering for color depth - Doug Hill - blacklight building
- ▣ Variation of part type (brick vs. plate, etc) for color density & texture, color mixing

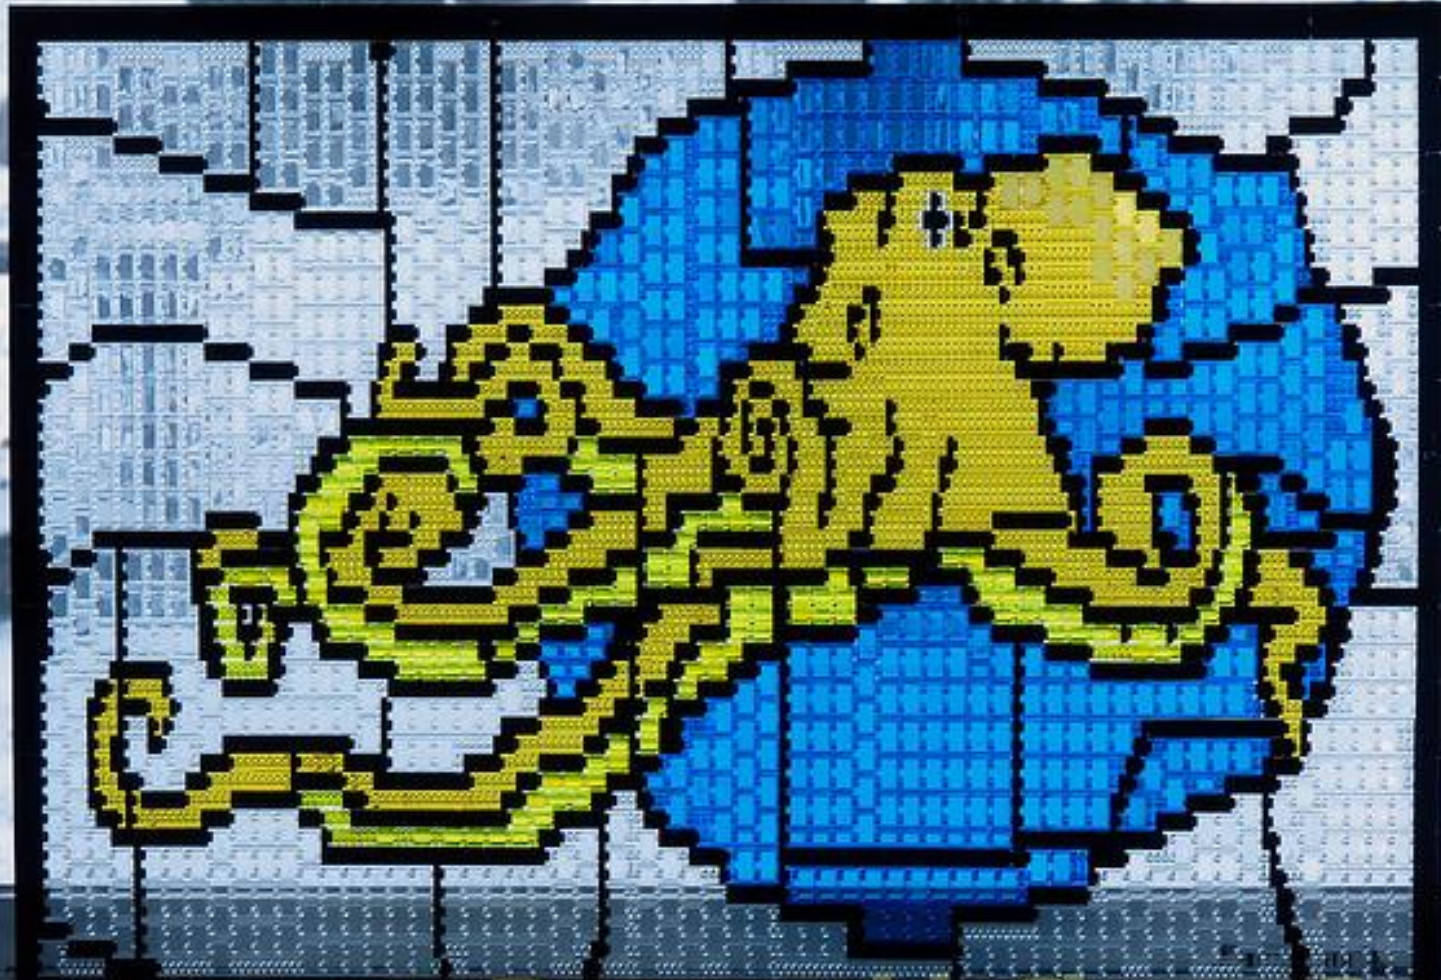

Who's Building With Transparent Brick, Anyway?

- ▣ Lots of folks in small scale
- ▣ Chris Doyle (ReasonablyClever)
 - Pop culture images
- ▣ Doug Hill (Baggadonuts) - blacklight mosaicsKatie Walker
 - Cheese wedge mosaics
- ▣ Janey Gunning
 - Mosaics, Sculptural
- ▣ Arthur Gugick
 - Combines Trans with Opaque in Mosaics
- ▣ Alyska Bailey Peterson (PontyKitty Studios)
 - stained glass window recreations

Stained Glass Specifics

- ▣ Scale and part estimation for budgeting (3-5x more expensive than opaque mosaics!)
- ▣ Op black leading or not?
- ▣ Mosaic building programs vs. freehand

©2011 pointykitty.net

Sculptural Building

- ▣ Tricky due to lack of part variety
- ▣ Stand Alone Works
- ▣ Incorporating Transparent Brick into larger MOCs
